

Makerspace Fraction Challenge

Project Self-Reflection

Student Name:Graham G.

Project Name:Swim With Fractions

What is the most important thing you learned in this project:

I learned that fractions are not just math because I played lots of games and they all had fractions. I learned that it was fun to write a script because I wrote it so fast.

What do you wish you had spent more time on or done differently

I wish I got more ideas to do on my game such as an army base or something else. They would show fractions on the roof.

What part of the project did you do your best work on:

I did my best on my game. It was hard but I finished It. I did my best on making the iMovie.

What was the most enjoyable part of this project:

I enjoyed building my game because it was fun wrapping all the tape and making the poster that tell you how to play the game.

What was the least enjoyable part of this project:

It was challenging when I had to do my commercial because it was hard to memorize the words.

How could you change this project to make it better next time:

Next time, I would not dig out some of the styrofoam out of the side so I do not have to clean up all of the mess.
