

Makerspace Fraction Challenge

Project Self-Reflection

Student Name: Jaren

Project Name: The Candy Fraction Zone

1. What is the most important thing you learned in this project:

I learned that great things may take long, or some things are worth a wait. That's just part of life.

2. What do you wish you had spent more time on or done differently:

I should have spent more time on wording. I should have made more fractions. If I spent more time on wording, I wouldn't have to explain so much. If I had more fractions, I could have more people know why I'm doing this.

3. What part of the project did you do your best work on:

I worked best on the creativity. I also worked hard on planning what I could make. Decoration was a blast and I would only stop doing it as I started to get finish.

4. What was the most enjoyable part of this project:

DEFINITELY the creativity! Building was SO fun! I also liked paying other people's games.

It's very enjoyable because with both of those things, you get to move around and do stuff.

5. What was the least enjoyable part of this project:

The least enjoyable part of this project was probably waiting for someone to play your game. I didn't like this part because all you do is stand around and wait.

6. How could you change this project to make it better next time:

I would like to have more build/video time. The reason I would like that is because things take time. It's hard to do creativity in limited time.
