

Makerspace Fraction Challenge

Project Self-Reflection

Student Name: Parker M.

Project Name: Fraction Island

Partner Name: Rex H.

1. What is the most important thing you learned in this project: I learned that you could add fractions and I also learned how to use the iMovie app.
2. What do you wish you had spent more time on or done differently: I wish that it was a tinier, more smaller model. One of the things that I would've done is made it a game that can be played multiple ways.
3. What part of the project did you do your best work on: All of it has little things that are great rather than one big bold great thing and other things that have no interesting things about them.
4. What was the most enjoyable part of this project: iMovie commercials because this was my first time using iMovie. I really enjoyed it.
5. What was the least enjoyable part of this project: Having the model being to big. It was hard to move. I would like it more portable.
6. How could you change this project to make it better next time: Stay on task and always remember to relate fractions to the creation. Also, *Warning* Stay calm when it is your first time using iMovie.
